

Assignment No.8

Q1. Find minimum and maximum number in array.

:-Code :-

```
// Find minimum and maximum number in array
#include<stdio.h>
int greatest(int*,int);
int smallest(int*,int);
void main(){
    int n,i,great,small;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }
    great=greatest(arr,n);
    small=smallest(arr,n);
    for(i=0;i<n;i++){
        if(arr[i]<small){
            small=arr[i];
        }
    }
    printf("Smallest number in array is :%d \n",small);
    printf("Greatest number in array is :%d \n",great);
}
int greatest(int* arr,int n){
    int i,great=arr[0];
    for(i=0;i<n;i++){
        if(arr[i]>great){
            great=arr[i];
        }
    }
    return great;
}
int smallest(int* arr,int n){
    int i,small=arr[0];
    for(i=0;i<n;i++){
```

```
        if(arr[i]<small){
            small=arr[i];
        }
    }
    return small;
}
```

Q2. Search the given number in array.

-:Code :-

//Search the given number in array.

```
#include<stdio.h>
void main(){
    int i,n;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }
    i=searchnum(arr,n);
    if(i!=0){
        printf("The given search number is present on %d position in array\n",i);
    }
    else{
        printf("The number is not prasant in Array");
    }
}

int searchnum(int* arr,int n){
    int i,search,check=0;
    printf("Enter the Number you want to search :");
    scanf("%d",&search);
    for(i=0;i<n;i++){
        if(arr[i]==search){
            return i+1;
        }
    }
    if(check==0){
        return 0;
    }
}
```

Q3. Find sum of all numbers.

-:Code :-

//Find sum of all numbers.

```
#include<stdio.h>
int sumofnum(int*,int);
void main(){
    int n,i;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }
    int sum=sumofnum(arr,n);
    printf("The Sum of numbers in Array is : %d",sum);
}
int sumofnum(int* arr,int n){
    int i,sum=0;
    for(i=0;i<n;i++){
        sum=sum+arr[i];
    }
    return sum;
}
```

Q4. Find odd and even among the numbers.

-:Code :-

//Find odd and even among the numbers.

```
#include<stdio.h>
void evenum(int*,int);
void main(){
    int n,i;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }
    evenum(arr,n);
}
void evenum(int* arr,int n){
    int i,j=0,k=0;
    int even[n],odd[n];
    for(i=0;i<n;i++){
        if(arr[i]%2==0){
            even[j]=arr[i];
            j++;
        }else{
            odd[k]=arr[i];
            k++;
        }
    }
    printf("\n The Even numbers in Array is : ");
    for(i=0;i<j;i++){
        printf(" %d",even[i]);
    }
    printf("\n The Odd numbers in Array is :");
    for(i=0;i<k;i++){
        printf(" %d",odd[i]);
    }
}
```

Q5. Print alternate elements in array.

-:Code :-

//Print alternate elements in array

```
#include<stdio.h>
void alternum(int*,int);
void main(){
    int n,i;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }
    alternum(arr,n);
}
void alternum(int* arr,int n){
    int i;
    for(i=0;i<n;i++){
        if(arr[i]%2==0){
            printf(" %d",arr[i]);
        }
    }
    for(i=0;i<n;i++){
        if(arr[i]%2!=0){
            printf(" %d",arr[i]);
        }
    }
}
```

Q6. Accept array and print only prime numbers of array

-:Code :-

//Accept array and print only prime numbers of array.

```
#include<stdio.h>
void alternum(int* arr,int n);
void main(){
    int n,i;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n],even[n],odd[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }

    alternum(arr,n);
}
void alternum(int* arr,int n){
    int i;
    for(i=1;i<n;i++){
        if(arr[i]==2||arr[i]==3||arr[i]==5||arr[i]==7){
            printf(" %d",arr[i]);
        }
        if(arr[i]%2!=0&&arr[i]%3!=0&&arr[i]%5!=0&&arr[i]%7!=0){
            printf(" %d",arr[i]);
        }
    }
}
```

Q7. Take two array and add sum in third array

-:Code :-

//Take two array and add sum in third array

```
#include<stdio.h>
void sumofarray(int*,int*,int);
void main(){
    int n,i;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr1[n],arr2[n];
    printf("Enter the First Array:\n");
    for(i=0;i<n;i++){
        scanf("%d",&arr1[i]);
    }
    printf("Enter the Second Array:\n");
    for(i=0;i<n;i++){
        scanf("%d",&arr2[i]);
    }
    sumofarray(arr1,arr2,n);
}
void sumofarray(int* arr1,int* arr2,int n){
    int i;
    printf("Sum of Both Array is:\n");
    for(i=0;i<n;i++){
        printf(" %d",arr1[i]+arr2[i]);
    }
}
```

Q8. Merge two arrays

-:Code :-

```
// Merge two arrays
#include<stdio.h>
int* mergeofarray(int*,int*,int*,int,int,int);
void main(){
    int n1,n2,i;
    printf("Enter the Size of array :");
    scanf("%d",&n1);
    int arr1[n1];
    printf("Enter the First Array:\n");
    for(i=0;i<n1;i++){
        scanf("%d",&arr1[i]);
    }
    printf("Enter the Size of array :");
    scanf("%d",&n2);
    int arr2[n2];
    printf("Enter the Second Array:\n");
    for(i=0;i<n2;i++){
        scanf("%d",&arr2[i]);
    }
    int n=n1+n2;
    int arr[n];
    mergeofarray(arr,arr1,arr2,n,n1,n2);
    printf("Merge of Both Array is:\n");
    for(i=0;i<n;i++){
        printf(" %d",arr[i]);
    }
}

int* mergeofarray(int* arr,int* arr1,int* arr2,int n,int n1,int n2){
    int i,j;
    for(i=0;i<n1;i++){
        arr[i]=arr1[i];
    }
    for(j=0;j<n2;j++,i++){
        arr[i]=arr2[j];
    }
    return arr;
}
```

Q9. Reverse the given array.

-:Code :-

```
//Reverse the given array
```

```
#include<stdio.h>
```

```
void main(){
```

```
    int n,i;
```

```
    printf("Enter the Size of array :");
```

```
    scanf("%d",&n);
```

```
    int arr[n];
```

```
    for(i=0;i<n;i++){
```

```
        scanf("%d",&arr[i]);
```

```
    }
```

```
    for(i=n-1;i>=0;i--){
```

```
        printf(" %d",arr[i]);
```

```
    }
```

```
}
```

Q10. Sort the array.

-:Code :-

```
//Sort the array
#include<stdio.h>
void sortarray(int*,int);
void main(){
    int n,i;
    printf("Enter the Size of array :");
    scanf("%d",&n);
    int arr[n];
    for(i=0;i<n;i++){
        scanf("%d",&arr[i]);
    }
    sortarray(arr,n);
    for(i=0;i<n;i++){
        printf(" %d",arr[i]);
    }
}
void sortarray(int* arr,int n){
    int i,j,temp;
    for(i=0;i<n-1;i++){
        for(j=i+1;j<n;j++){
            if(arr[i]>arr[j]){
                temp=arr[i];
                arr[i]=arr[j];
                arr[j]=temp;
            }
        }
    }
}
}
```
